

EEL6871 Autonomic Computing Fall 2013
Assigned: Thursday, Aug-22-2013
Due: Tuesday, Aug-27-2013 5pm

Homework 0

Introduction

1. Write a statement that you have read the student **honor code** and understand the nature and implications of dishonest behavior, including receiving a failing grade for this class.
2. Write a statement indicating that you understand the following homework submission rules.
 - Follow strictly to the format specified in every homework. Incorrect submission formats will lead to a grade reduction.
 - You will be given access to a machine for homeworks in this course. Your program will be tested on a machine with exactly the same configuration as the machine to which you have access. Make sure to test your program before submission.
 - All submissions are expected by the deadline specified in the homework assignment. Grade is automatically reduced by 25% for every late day.
 - Make sure you test your submitted code using the tar file you submitted on your machine used for course homework. If untar, make, compile or any other command needed to execute your program do not work, your homework grade will be zero.
3. Provide the following information:
 - (a) Name.
 - (b) Undergraduate major (e.g. EE, CE, CS).
 - (c) Graduate major at UF (e.g. EE, CE, CISE).
 - (d) Programming languages in which you are proficient.
 - (e) Operating systems you are familiar with.
 - (f) Courses on programming or data structures you have taken, indicating whether at the graduate or undergraduate level.
 - (g) Size of the largest program you have written (in number of lines of code).

Submission

Include all the above information in a PDF file named as *yourname_hw0.pdf*.
